

# Let's keep working towards a sustainable future

During the past decade, Southern Grampians Shire Council has delivered a wide range of outcomes across a broad range of sustainability areas including investing in renewable energy.

To create a renewed roadmap to a shared sustainable future, **we need to check in with the community's current and future needs.**

Together with our residents and stakeholders, council will continue to build a region that takes responsibility across a broad range of sustainability areas like land, water, waste, liveability, and climate change.
